

## REVERSE PARK

1. Gap Should be a minimum of 1 1/2 car lengths
2. Stop slightly ahead of and parallel to the front parked car about 1 metre away.
3. Reverse until the backs of the cars are level and turn the wheel 1 1/2 times to the left. Remember the car front will swing out as you move.
4. As you see the door mirror of your car line up with the back of the other car, turn the steering wheel 1 1/2 times to the right.
5. When you see the offside corner of the other car in the bottom left corner of your windscreen, steer 1 1/2 times to the right.
6. When you are almost parallel with the kerb, steer 1 1/2 times to the left to straighten the wheels and stop.
7. If necessary, move backwards or forwards to straighten up.
